PROFESSIONAL SUMMARY

Python & JavaScript Full-Stack Developer with 3+ years of experience building scalable, high-performance web applications. Skilled in React.js, Next.js, Nuxt.js, FastAPI, Laravel, and Node.js with strong expertise in VPS deployment, enterprise integrations (Azure, Microsoft Graph API, OneDrive, Outlook), and animated premium-grade web interfaces.

Published NPM packages with 3K+ downloads. Passionate about clean architecture, design systems, and shipping products that make an impact.

PROFESSIONAL EXPERIENCE

Full-Stack Developer · Withthetech Solutions

01/2025 – Present

Rajkot, India · Hybrid

- ▶ Led end-to-end delivery of **2 major client projects** from architecture through production deployment.
- ▶ Engineered a company-wide **legacy foundation template** for frontend (Vite + React) and backend (Laravel) establishing a unified design system and architecture pattern used across all projects.
- ▶ Implemented complex enterprise integrations: **Azure, Microsoft Graph API**, Outlook email workflows, and OneDrive file management.
- ▶ Crafted a massively animated, **premium-quality website** with advanced motion design using GSAP and Framer Motion.

Full-Stack Developer · Freelancer

08/2024 – Present

Ahmedabad, India

- ▶ Developed 5+ scalable full-stack applications using React.js, FastAPI/Node.js, Vite.js, Nuxt.js, and Vue.js.
- ▶ Designed REST APIs, implemented database schemas, and deployed applications on VPS (Ubuntu, Nginx, PM2).
- ▶ Improved application performance by up to **40%** through optimized API responses, caching, and bundle reduction.
- ▶ Delivered secure, responsive, and client-customized dashboards and admin panels.

Full-Stack Developer · Trio Infotech

07/2023 – 07/2024

Jamnagar, India

- ▶ Built and maintained 10+ enterprise web applications using React.js, Node.js, .NET, Entity Framework, and PHP.
- ▶ Collaborated with cross-functional teams to deliver feature-rich product modules with strong API integrations.
- ▶ Improved system stability and reduced production bugs through proactive code reviews and optimized architecture.

Internship Trainee · Codac Point

08/2022 – 03/2023

Jamnagar, India

- ▶ Developed 3 production-ready applications using React.js, Next.js, HTML, CSS, and JavaScript.
- ▶ Gained hands-on exposure to agile workflows, CI/CD basics, and modern frontend state-management patterns.

PROJECTS

Bhatt International - Industrial Website [↗ Live](#)

Stack: Next.js, GSAP, Framer Motion, Three.js, Tailwind CSS, TypeScript

Designed and developed a visually premium, heavily animated website for a global metals trading company (est. 1986, Jamnagar). Built immersive 3D scenes with Three.js, scroll-driven animations via GSAP, and fluid micro-interactions with Framer Motion to create a world-class digital presence. (Ongoing)

Industrial Inventory Management ERP

Stack: Vite + React, Laravel, Azure, Microsoft Graph API, Outlook, OneDrive, MySQL

Architected a full-featured ERP system for a private limited company managing 5+ Indian warehouses and 2+ international locations with 50-75+ concurrent users. Implemented RBAC with granular page-level access control, integrated OneDrive for legacy file migration, built a custom barcode management system per product/warehouse/bin, and handled complex real-time Azure + Outlook workflows all on a scalable Laravel + React foundation.

Meticha - Website (Product-based IT Company) [↗ Live](#)

Stack: Next.js, Tailwind CSS, Framer Motion, Magic UI, TypeScript

Engineered a custom platform for a product-based IT company with a fully custom blog module that boosted content publishing efficiency by 40% and increased organic traffic by 30% through improved SEO.

Jetpack Compose Snippets [↗ Live](#)

Stack: Nuxt.js, Tailwind CSS, Kotlin, MySQL, AWS EC2, AWS S3, AWS Route53

Architected a platform for discovering and sharing reusable Jetpack Compose UI components, featuring 50+ curated snippets. Attracted 100+ monthly users and reduced Android UI implementation time by up to 40% for developers through a centralized, searchable library.

gist-viewer-vue -NPM Package [↗ Live](#)

Stack: Vue.js, Tailwind CSS, Prism.js

Published an NPM package to easily fetch and display GitHub Gists in Vue applications, achieving 1,000+ downloads. Reduced Gist integration time by over 80% for developers with customizable components.

browser-permissions-helper - NPM Package [↗ Live](#)

Stack: TypeScript

A lightweight library simplifying browser permission management in web apps, achieving 1,500+ downloads within 6 months. Reduced implementation effort by up to 60% and ensured a seamless user experience with minimal code.

TECHNICAL SKILLS

Backend

Python, FastAPI, Node.js, Express.js, Laravel, PHP, REST APIs, Authentication, SQL, MySQL, Prisma ORM

Frontend

React.js, Next.js, Nuxt.js, Vue.js, Tailwind CSS, TypeScript, Redux, GSAP, Framer Motion, Three.js

Cloud & DevOps

Azure, Microsoft Graph API, AWS EC2, AWS S3, Route53, VPS (Ubuntu), Nginx, PM2, Docker (basic)

EDUCATION

Master of Computer Applications (M.C.A)

L J Institute of Computer Applications

07/2024 – 05/2026

Bachelor of Computer Applications (B.C.A)

Smt. C.Z.M. Gosrani B.C.A. College · CGPA 8.5

06/2021 – 05/2024

ACHIEVEMENTS & CERTIFICATIONS

- Published NPM packages: gist-viewer-vue & browser-permissions-helper (3K+ combined downloads)
- New India Vibrant Hackathon - Grand Finale
- New India Vibrant Hackathon - Regional Round
- Conducted a technical session on the Internals of React.js
- Completed 100 Days of Vue.js Challenge
